Follow these steps to access the web version of FleetComplete

Areas

(formerly called Markers)

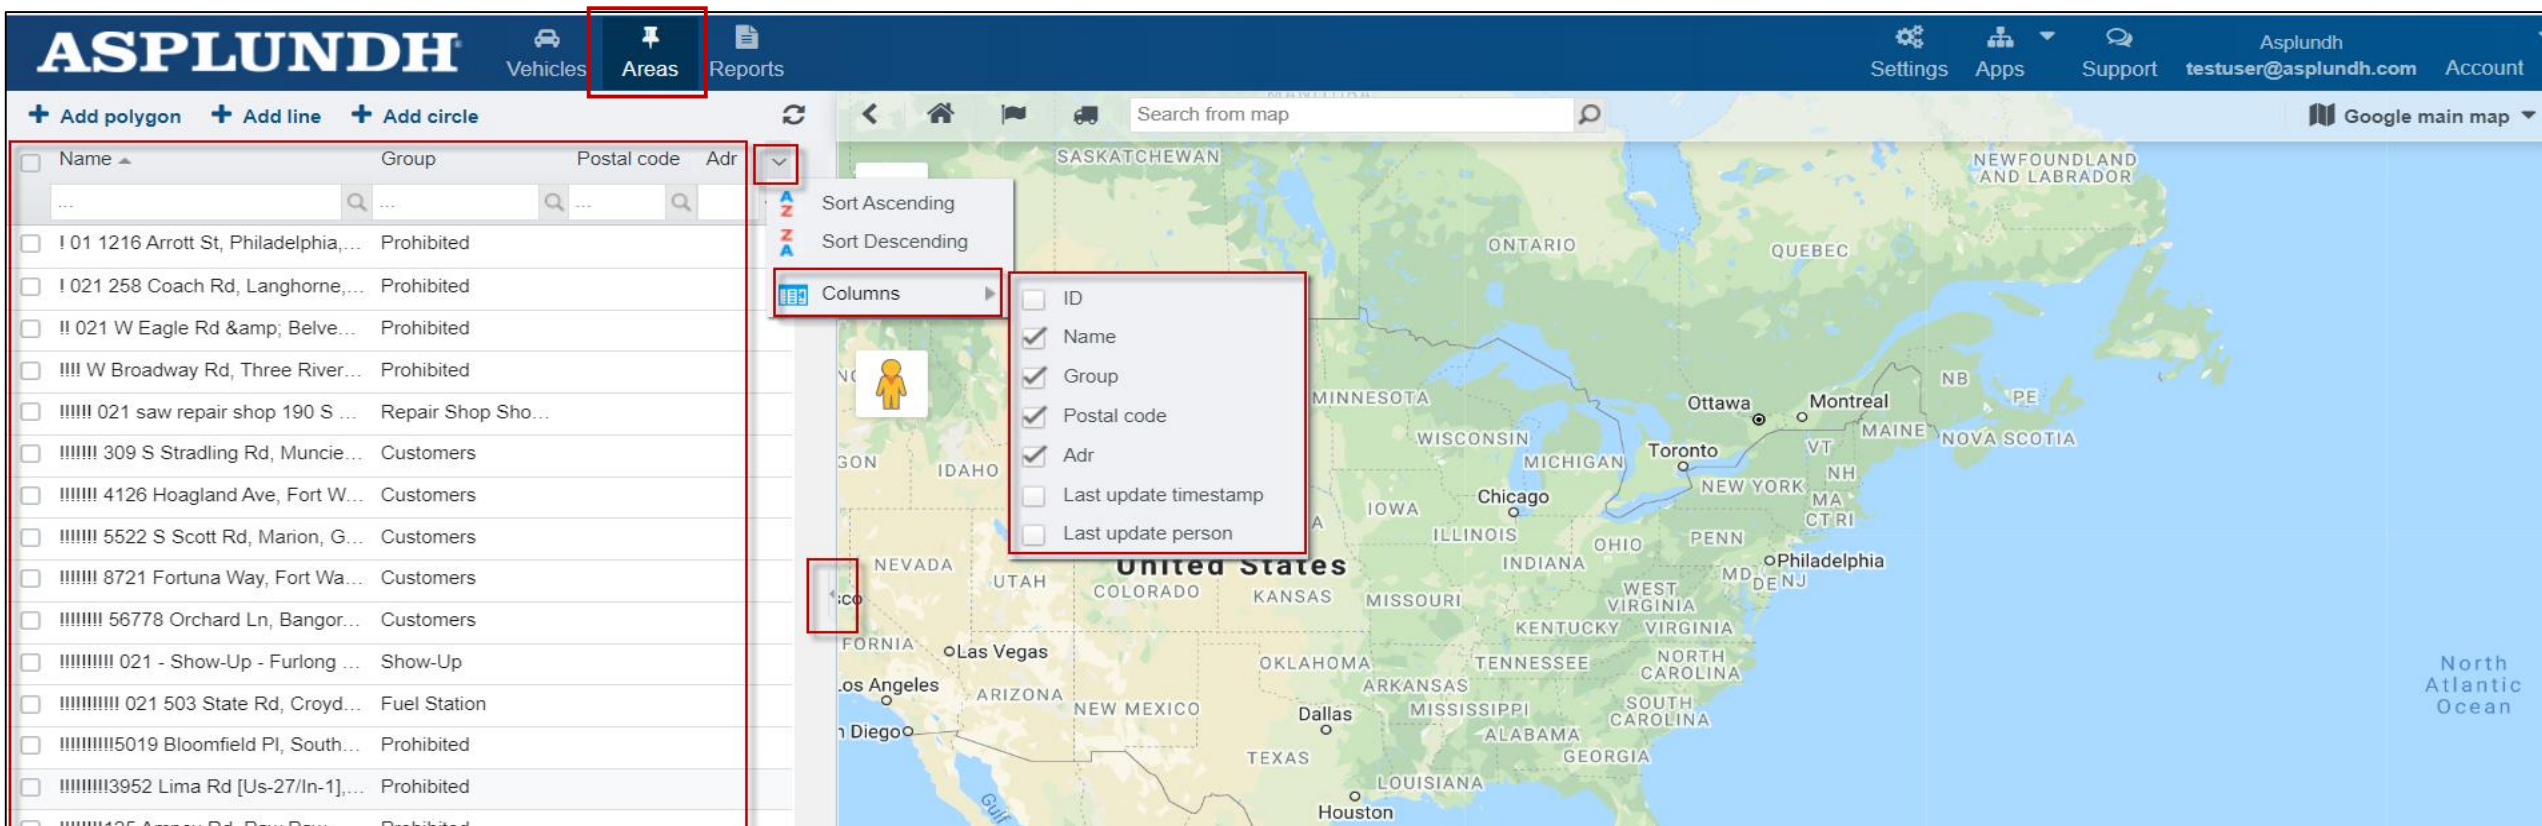

Areas list

Areas on the map

Markers are now Areas. The **Areas** function displays a list of all the defined areas available to the user. Additional columns can be added to the table by choosing the drop down arrow in any column, select columns then the field to add. The areas list can be hidden (map expanded) by selecting the arrow along the list window border.

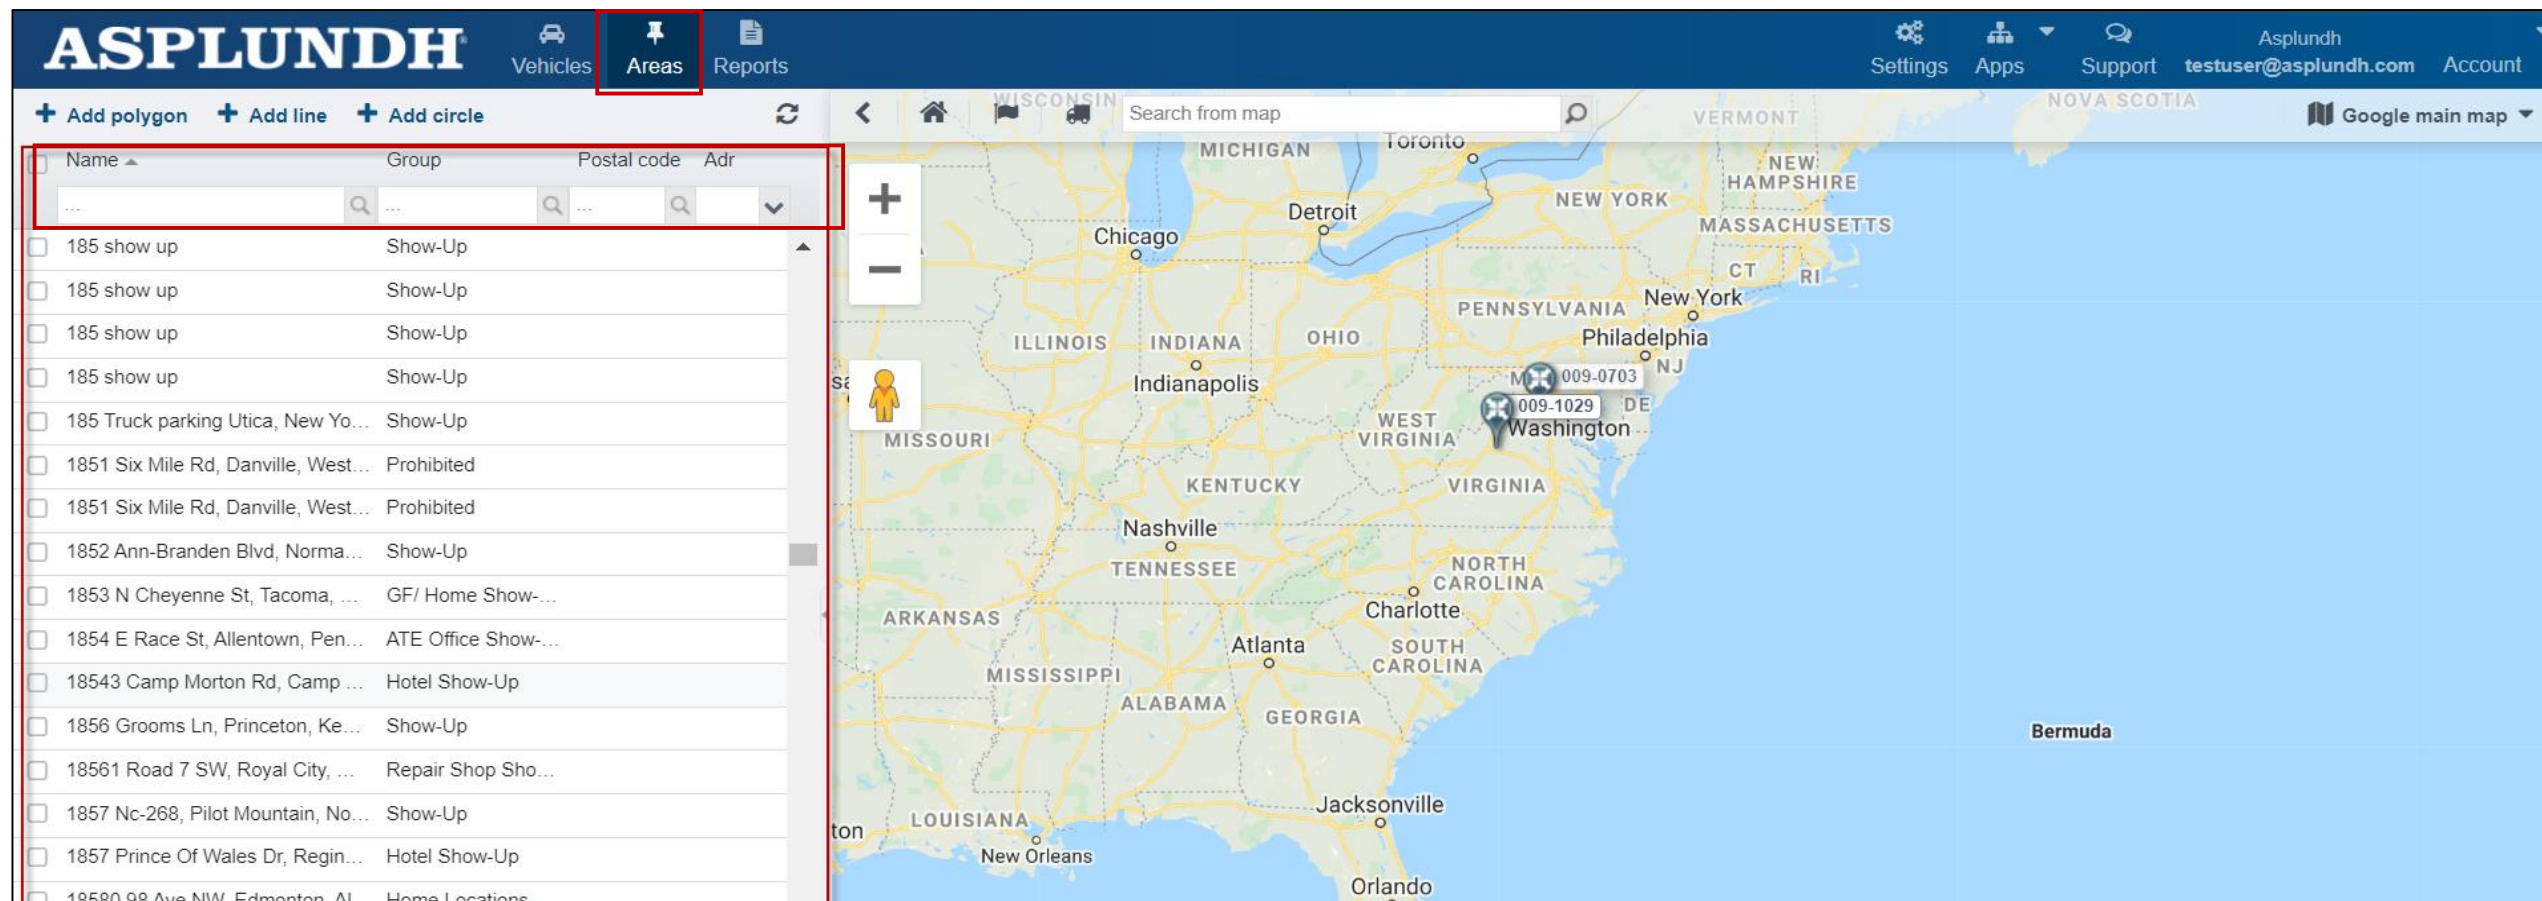

The screenshot shows the ASPLUNDH web application interface. The top navigation bar includes 'Vehicles', 'Areas' (highlighted with a red box), and 'Reports'. The 'Areas' section is active, displaying a list of areas on the left and a map of the United States on the right. The list has columns for Name, Group, Postal code, and Address. A dropdown menu is open over the list, showing options for sorting (Ascending/Descending) and columns. The 'Columns' menu is open, showing a list of fields to be added to the table: ID, Name, Group, Postal code, Address, Last update timestamp, and Last update person. The 'Areas' list window border has a red box around it, and a red box highlights the arrow on the left side of the list window, which is used to toggle the list visibility.

Name	Group	Postal code	Adr
